THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON

THIS IS UNEVALUATED INFORMATION

SOURCE

1. Location:

Southeast of Dzerzhinsk, south of the railroad line to Gorki, west of all chemical plants of Dzerzhinsk-Igumnovo (43°38'E/56°14'N), Gorki Oblast.

2. Plant installations:

The plant was not damaged during the war. Because of many new constructions the plant area is difficult to survey and the plant layout does not cover all the buildings. Power was supplied by a large power plant farther to the east.

3. Work force:

About 1,000 laborers including 600 women working three shifts.

4. Production:

Phosphorus, hydrochloric acid, carbide, calcium chloride, soda. (Laborers wore protective clothing).

Comment:

The plant layout is difficult to survey and to reproduce because of the many new constructions and the great number of small plant buildings. Therefore all information received on post-war enlargements at the Kalinin Chemical Plant is incomplete.

The above report, though old, is forwarded as the attached sketch gives the arrangement of the various plant installations and reflects the production process. The data require confirmation.
